Smart Cities Emerging

26th Feb, 26

- Analyzes, optimizes traffic, monitoring traffic.
- Real time city decision, crises management. (eg. wayz app is an ai workload).
- Autonomus public transport
- predictive public safety

  - hospital
  - traffic
  -

- Integrated cities to recpit safe
  ↳ cross domain AI workloads (co working in coordination with all domain working in sync).
-

Problems :

- Bias
  - ↳ surveliance
  - ↳ facial recognition.
  - ↳ AI driven policing (overpolicing).
- Opaque decision making.
  - ↳ everything is a black box.
- Job displacement

Media & Entertainment

Use Cases.

- Compose, write, songs. (eg. Bo Burnhum).
- Gaming
- Newspaper
- SM. ⇒ phone records & sells to SM.
- NLP workloads triggering our brains.
- content creation & production
- Voice enhancement
- automatic camera noticing.
- music & audio
- recommendation

- AI can be random.
- AI is a probabilistic system.

- content distribution & tags.
  - ↳ netflix summaries, genres.

- analytics & insights
  - ↳ viewers

- advertising & SM., marketing
  - ↳ automative creative selection.

- Publication
  - ↳ AI assistant.
  - ↳ sports coverage.
  - ↳

- Gaming
  - ↳ anticheat codes AI prevents that.
  - ↳.

Not Yet Solved fully

→ Full engaging AI content

→ Long form of music compositional

→ Building sensible games.

→ Audience understanding

→ Real time adaptive gaming.

Problems & Risks

→ copyright enrichment.

→ creativity distortion.

→ job elimination

→ misrepresentation.

→ misinformation & deepfakes.

→ profile mirroring

→ algorithmic patterns to check addictive patterns
