Retail

26th March

Solved Cases

→ personalization, purchase history, analyze browsing history, drives cross selling & upscaling.

→ Engagement of everything, notices small details.

2nd

Demand forecasting

→ Inventory optimization,

↳ rack finishing

↳ ordering stuff.

↳ marking things we don't need.

↳ peoples engagement in store.

3rd
Chatbots & call centres. virtual

4th
Dynamic pricing & promotion optimization

5th
Theft & fraud prevention.

6th
Virtual Tryon, visual search

7th
Cashier less & checkout lines.

↳ amazon go

8th
marketing content generation

Evolving/Use cases

1st fully autonomus stores.
↳ no staff

2

Perfect demand forecasting

↳ no waste (vegetables)

↳ predict shelf life.

↳ still hard coz of weather & staff.

3

True omni challenge personalization

↳ no hop storing.

↳ cross sharing inventory challenge coz competitors lose competitation.

4. AI store associates.

↳ robots

↳ lack use of emotional intelligence

5. Fully automatic logistics.

6. 100% design product by AI

7. machine customers.

↳ AI buying for customers.

↳ smart purchases

↳ adoption of smart (europe has smart fridges)

Problems

1. privacy & misuse.

2. algorithm bias & unfair pricing.

3. dynamic backlash pricing

4. Job displacement

5. over automation lack of empathy

6. fragmented AI

7. Security risks & attacks.
